It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

In the Specification

Col. 6, line 13: " $m \geq 1$ " should read $--m \geq 1--$.

In the Claims

Col. 8, line 20, Claim 13: should read

--A system for managing a queue in a flow-identification arrangement susceptible to unbalanced bandwidth allocation, comprising:

a server including a CPU arrangement programmed and arranged to

detect a matching flow identification between a recently-received incoming packet with at least one packet selected from a set of outgoing packets; and

in response to the matching flow identification

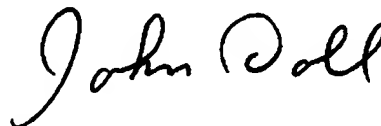

detection, mitigate unbalanced bandwidth allocation due to congestion-problem flows by reducing the

processing priority of at least one of: said at least one selected packet, and the recently-received packet,

wherein the incoming packet is not a retransmission of said at least one selected packet.--.
